

Fig. 1

The diagram illustrates a search system architecture with the following components and data flows:

- Search User Interface (16):** Represented by an oval at the bottom.
- Index Document Database (14):** Represented by a cylinder on the left.
- Logical Document Database (12):** Represented by a cylinder at the top right.

Data flows are indicated by arrows:

- Query (42):** An arrow pointing from the Search User Interface to the Index Document Database.
- Query Results (44):** An arrow pointing from the Index Document Database to the Search User Interface.
- Generate Index Documents (46):** An arrow pointing from the Logical Document Database to the Index Document Database.
- Open Document From Query Results (50):** An arrow pointing from the Search User Interface to the Logical Document Database.
- Display Document Data:** An arrow pointing from the Logical Document Database to the Search User Interface.
